

TIMEWOLF ACCESSORIES

VERSION 4.0

GET THE ACCESSORIES THAT YOU NEED FOR YOUR TIME WOLF

With Time Wolf 4.0 Scheduling module operators can create daily, weekly and monthly schedules; quickly and efficiently. In addition the scheduling interface also gives you the ability to use flex-time, floating time, rotating schedules even shift differentials. The Scheduling Add-on is compatible with all versions of Time Wolf.

The Accruals Plus Add-on can be added to any version of Time Wolf. The standard accruals module included in Time Wolf gives you two accruals buckets, which is usually sufficient for most companies. The Accruals+ Module gives you unlimited accruals buckets! Moreover, Accruals+ gives you far greater control with more specific options.

Adding a Multi-User Network gives you the ability to have multiple employees access Time Wolf across a network, to clock in and out. The software is stored on your companies server and accessible by any workstation with the proper user rights and connection to the server.

Time Wolf Badges are typically either barcode or proximity badges and made of the highest quality materials. Durable and cost effective, Time Wolf Badges can be used and reused over and over again. Time Wolf Badges are meant to be used with either the Time Wolf Plus Scanner or the Time Wolf Zephyr.

WE TRY TO MAKE THE TIME & ATTENDANCE ASPECT OF YOUR LIFE AS PAINLESS AS POSSIBLE

ADD USERS

Time Wolf comes with the ability to upgrade your employee count up to 100 employees. If you have surpassed your employee count. If you have more than 100 employees call us today!

ADD A HAND READER

The Hand Reader (Scout) uses the latest in biometric hand geometry technology, to verify the identity of an employee. The hand reader does this by scanning the users hand, taking over 90 distinct measurements.

ADD A PROX BADGE READER

The Proximity Badge Reader (Zephyr) uses standard proximity badge reader technology to confirm an employees identity and simultaneously clocks the person in or out. The Zephyr also comes with vocalized responses for easy operation.

UPGRADE TO INFINITIME

If your looking for options and not finding them, don't worry. Time Wolf is upgradeable to InfiniTime 7.0 InfiniTime 7.0 is a more sophisticated labor management system and comes with a great deal of features to help you manage your organizations labor. InfiniTime is perfect for companies ranging from over 25-over 50,000. Using web 2.0 technology and an Oracle database, the InfiniTime 7.0 Labor Management System offers the very best of the time & attendance world, using the latest technologies, otherwise unavailable from other companies. If your considering upgrading your system to InfiniTime 7.0 we recommend you visit www.InfiniTime.com and view the InfiniTime videos.

LET US HELP YOU FIND WHAT YOU NEED

ADD A BARCODE READER

The Barcode Reader (Plus Scanner) is a simple barcode badge reader that connects directly into your computer, where users slide their badge to clock in / out. The Plus Scanner comes with 10 free cards!

ADD FINGER PRINT READER

The Biometric Finger Print Reader (Juno) utilizes the latest technologies in the biometric fingerprint verification world. Users simply present their fingerprint for scan and the Juno verifies the users identity and clocks them in /out
